About IConCES 2020

Civil engineering is undergoing rapid changes driven by globalization. Due to the rapid urbanization, environmental change, safety and security concerns are impacting the global environment. To cope up with these changes, construction industry demands scientific advances in the field of Structures, Environmental, Transportation and Geo-tech etc. Obviously, such technical advancements demand civil engineers to acquire more knowledge than in the past. And also construction industry is the most responsible for Green House emissions. In this context, the Department of Civil Engineering at GRIET Hyderabad is organizing "International Conference on Civil Engineering aspects for Sustainability (IconCES 2020)". The main objective of IconCES-2020 is to bring Academicians, Industry Experts, Researchers and Engineers on one stage to discuss their works in the area of Civil Engineering.
